

# Forces of psychohistory

天下大勢

by Piotr Plebaniak

## Motto for the book:

(words of Michio Kaku, PhD; <https://youtu.be/Izp7q6OXXS4?t=137>):

A major component of intelligence is the ability to predict the future. The ability to model today in order to see tomorrow. A high level of intelligence requires the ability to understand the laws of nature, the laws of human nature. What is the most likely outcome of future events. [...] If they are more intelligent than us, they will see the future better than we do. They will see outcomes that we will not see. They will model scenarios that we don't even dream of. They will be able to outsmart us... every time.

## Table of Contents

Theme, Chapter/Essay	Page in Polish language edition
The co-authors' and the author's statements	15
Acknowledgments	16
<b><i>Know the future to survive</i></b> Introduction. The author's vision	19
Reference system and conventions used in the book	39

<b><i>Key truths and principles</i></b> The most important concepts of this book condensed to three pages of text	41
--	----
